

GRP PIPE SEALS

We are pleased to offer our own range of elastomeric seals for use in GRP (glass fibre reinforced plastics) pipelines.

VIP-Polymers GRP pipe seals can be supplied in a number of stock elastomeric compounds designed to comply with the latest EU and Worldwide regulations. Where a suitable compound is not readily available, our state of the art laboratories are available to facilitate bespoke compound development:

- Water transmission and distribution (potable and raw water)
- Sanitary sewerage collection and outfalls
- Storm sewers and drainage
- Sea water intake, outfalls and cooling water lines
- Industrial effluents
- Pump Shafts
- Battery Tanks
- GRP Tanks

The renowned Reka@Gasket System is composed of two gaskets and one stopper and is available in sizes DN 150 - DN2400. The Reka@Gasket offers the following benefits:

- Tight, efficient joints designed to eliminate infiltration and exfiltration.

- Ease of joining, reducing installation time.
- Accommodates small changes in line direction without fittings, or differential settlement.

We have also developed a range of EPDM seals suitable for use in GRP Jacking Pipe applications as well as others to suit virtually all industry wide pipe joining methods.

- Developed to meet and exceed the stringent requirements of both the mains and drainage marketplace
- Cast-in proprietary design also available
- We can also supply GRP Pipe seals in Nitrile
