

Repair Clamps and Fittings

REPAIR CLAMPS AND FITTINGS

VIP-Polymers have for a number of years developed and manufactured a range of sealing gaskets for pipe fittings and repair clamps used on a variety of applications:

- End load restraint systems
- Repair couplings
- Repair clamps (using “waffle pattern” repair mats)
- Stepped couplings
- Flange adaptors
- Dismantling joints
- Shoulder couplings
- Gripper couplings

With an advanced rubber to metal bonding facility available in-house, we can also offer reinforced repair mats incorporating components made from stainless steel, lead, aluminium, copper and iron. Large compression and injection moulding presses enable us to offer components up to 2.4 metres wide whilst our extrusion facility enables us to produce profiles of up to 300mm width.

- Multi region potable water approvals
- Variety of materials available to suit different applications
- Moulded or extruded seals available
- Ability to bond metal to rubber components
